

Out of Africa

The Big Idea:

First there was the big bang! Then life began on Earth 3.8 billion years ago. But when did humans arrive and where did we come from? If we can find out the answer to these questions perhaps we can figure out where we are heading in the future...

In Science, we'll be finding out:

- How life began in the sea then came out of the sea
- How fossils provide information about living things from the past
- Why the dinosaurs died out
- About the classification of plants and animals
- How plants and animals reproduce
- How living things evolve and change over time
- How plants and animals are adapted to their environment
- How adaptation leads to evolution
- Whether there is life on other planets

In Technology we'll be:

- What foods early humans ate, grew and cooked
- About prehistoric food and cooking techniques

In International, we'll be finding out:

- How superbugs evolve and spread around the world
