

Year 2 - Earth - Our Home

The Big Idea

All living things – plants, animals and people – have a home or somewhere to live that we call a ‘habitat’. A habitat can be huge like the ocean or small like a leaf. A habitat could be a forest on the other side of the world or it could be a tree in our local area. During this unit we will be focusing on Science, Technology and International.

In Science, we’ll be finding out:

- About the plants and animals living in forests
- About different types of trees
- About plants and animals that live in other habitats
- How to sort living things into different groups
- What a micro-habitat is and what creatures live there
- How animals are adapted to their environment
- How living things depend on each other

In Technology, we’ll be finding out:

- How to make a habitat and nesting box for bees

In International, we’ll be finding out:

- About the loss of the world’s forest habitats
