

Privacy on the Internet

Top Tips

- People you don't know are strangers. They might not be who they say they are.
- Just because you are talking to people on the computer it doesn't mean you can say horrible things. BE NICE!
- Keep your personal information private. Don't give away your secrets like your address or your age or your school.
- If you are ever worried then tell an adult you trust. This could be your mum or dad or even a teacher.
